Decorative moldings

Decorative moldings provide the finishing touch to your kitchen. They come in many different styles, but we have something for all of our door and drawer families. Use them to tie your style together, hide lighting or just as a decorative element.

You can choose how to mount them on your cabinets. Below we show the entire range and some different ways of mounting them, both above as moldings and below your cabinet, wrapped around the whole cabinet or just between your cover panels.

Lighting

A brighter kitchen life

Good lighting is an essential part of any kitchen. That's why we offer integrated lighting series perfectly dimensioned to fit our kitchen cabinets. And they all contain long-lasting built-in LEDs which consume up to 85% less energy and last up to 20 times longer than incandescent bulbs. Having integrated lighting in your kitchen is a great way to show off your favorite dinnerware, behind glass doors or in drawers. And, good lighting brings your cabinet doors and countertop to life too.

Get an even better kitchen life with the ability to dim, turn off and turn on lights wirelessly. All you need is TRÅDFRI LED driver and remote control. Or, use the TRÅDFRI gateway and IKEA Home Smart app to control every beam of light with your smart phone. We call it IKEA Smart Lighting.

All the IKEA Smart lighting products are now compatible with Apple HomeKit, Google Assistant and Amazon Alexa. With our devices, it's possible to voice control the lighting and adjust the lights using Amazon Alexa, Google Assistant, Apple's Home app and Siri voice commands.

Drawer lighting simplifies finding what you need even during those midnight kitchen raids. Opening and closing the drawer turns the light on and off automatically.

Countertop lighting should give you a clean, clear view of all the work you're doing in the kitchen.

Spotlights provide a focused light that is good for lighting smaller areas and behind glass doors.

Cabinet lighting illuminates your favorite kitchen doors and creates a cozy mood light in the entire kitchen.

Countertops

Your kitchen is the heart of your home, it's a room for everyone! How it performs and how it looks are two important factors. Even though doors and drawer fronts are the main style decision you make when updating your kitchen, your countertop can have a big impact on the overall look. However, the perfect countertop is not just about completing the look of your kitchen, it has an impact on its functionality too. When picking the right countertop there are many factors to consider, including your style, durability, maintenance, lifestyle and cost. Our countertops are available in pre-cut and custom-made options as well as in durable materials, finishes and thicknesses. Each surface has unique properties, with differing levels of water, wear and heat resistance.

How to choose your countertop:

01

What's your budget?
A stylish look does not have to cost a fortune, our countertops are available in a wide range of materials and expressions, pre-cut as well as custom-made to perfectly fit your style, needs and wallet.

02

What kind of material do you prefer? When deciding on material, consider how robust you need your countertop to be, how much you are prepared to look after it, and how you want it to look in your kitchen scheme.

03

Custom-made countertops are made to fit your kitchen layout, you can order the exact size you need, including cut-outs for your sink, faucet and cooktop. Pre-cut countertops are available in different sizes, and you can cut them to the desired length.

Built to last

When we test our countertops, we put them up against everything they'll face in your kitchen: liquids, oil, steam, heat, thumps, bumps and scratches. Once we're done, we're sure our countertops will last for many years to come.

Materials

Laminate

Laminate countertops are durable, affordable and easy to maintain, with lots of colors and expressions to choose from. Spills and grease are easy to wipe clean and the countertop keeps its beauty over time, making it a practical solution.

Wood

Worktops with a top layer of wood have all the qualities of solid wood, enhanced by modern technology. They are made with 1/8" layer of solid wood wrapped on particleboard. This increases the stability and makes them less likely to split or crack. They can be sanded down to remove minor scratches, and will keep their natural beauty over the years.

Quartz

Quartz is one of the hardest materials in nature, making the surface extremely durable and scratch resistant. Plus, the surface is smooth, non-porous and easy to keep clean.

Color overview

We offer pre-cut laminate countertops in two lengths. Choose between the many colors and expressions to find the perfect look. The laminate countertops can be cut into the length you need and finished with the edge strip included in the package.

Custom-made countertops

Big advantages of a custom-made countertop

Your custom-made countertop is made to fit your kitchen layout perfectly, with the least number of seams. You can order the exact length and depth you need for your kitchen island or bar solution as well as cut-outs for your sink, faucet and cooktop.

How to buy a custom-made countertop

01

Material and color

Choose a color that makes the kitchen your own.

02

The countertop profiles

Choose the desired profile for the edges. Depending on the material you've chosen for your countertop, you have different options.

03

Choose your sink

Choose the sink you want and if you want it top mounted or undermounted.

04

Take measurements

Then start to measure to see what size and shape of countertop you need. If you would like help with this, or with anything to do with the measuring of your kitchen, we can arrange for the measuring service to come to your home.

05

We're here to help

To design your custom-made countertop get help from an IKEA co-worker in the kitchen department at your local IKEA store.

06

Order

To order your custom-made countertop, please contact an IKEA co-worker in the kitchen department at your local IKEA store.

How to measure your countertop

Start by measuring your countertop from the corner where it attaches to the wall. Make sure to make your measurements alongside the wall and always start from the same point. When measuring the depth, start from the wall and measure out. Don't forget to add 1" for an overhang too.

If you need to measure for a freestanding countertop (for a kitchen island for example), simply start from one end and add 1" extra for an overhang.

To measure for a sink, start from the same point where you've taken your previous measurements and measure to the center of where you would like your sink to sit.

When you choose a quartz countertop you get a work surface that's extremely durable. It's scratch resistant and can withstand heavy impact. We construct our quartz countertops with natural quartz crystals (one of the hardest materials in nature) and high-quality polymer resins which make the surface smooth, non-porous and easy to keep clean. That means red wine and beetroot stains are a worry of the past. You can also order quartz backsplashes to complement your countertop.

Good to know

Clean using a soft cloth or sponge and warm water with a mild, non-abrasive detergent. Avoid using scouring products.

How to estimate the cost of your KASKER quartz countertop

$$(A \times D) + (B \times D) + (C \times D) = X \text{ square inches}$$

$$(X \text{ square inches}) / 144 \times \$X / \text{ft}^2 = \text{total price}$$

What's included in the price?

Sinks

A busy place in the kitchen

The sink and the area around it is one of the busiest places in the kitchen. You use it for everything from preparing food and rinsing vegetables, to storing dirty dishes and cleaning up. To make these activities as easy as possible, choose a sink and sink accessories that match your needs and the way you work in the kitchen.

How to choose your sink

01

How much space have you allocated for the sink? Our sink cabinets are 24, 30 or 36" wide.

02

Think about how you prepare food, but also how you clean up. Do you have a dishwasher or do you wash the dishes by hand? Do you need one bowl, two bowls or a sink with drainboard?

03

Complete your sink with sink accessories that help you organize the area in and around the sink, both when you prepare food and when you clean up (**see page 88**).

25
Year Limited
Warranty
Included

We test our sinks to ensure they can withstand the demand of everyday life in the kitchen. That's why all our sinks come with a free 25-year limited warranty (except FYNDIG). Find out more on **pages 100-101**.

Our range of sinks

Single bowl sinks

If space is an issue, one single bowl is a good option. Plus, in a big single bowl you can easily wash large pots and pans. Combine with sink accessories to make the bowl as functional as possible (**see page 88**).

Double bowl sinks

Having two bowls is ideal if you have a lot going on at the same time. For example, if one of the bowls is piling up with dirty dishes, you can still rinse off vegetables and the like in the other.

1½ bowl sinks

A one and a half bowl sink gives you the same advantages as a double bowl sink, but in a smaller area.

Sinks with drainboard

A sink with a drainboard is ideal for drying dishes, as the sloping surface makes excess water flow back into the bowl. Our sink with drainboard is reversible, so you can choose if you want the drainboard to the left or to the right.

Kitchen faucets

Saving water at every step

Earth may be covered in a lot of water, but very little of it is drinkable and even less is accessible. No organism can survive without it, and no new water is created. It's constantly recycled, but our freshwater supply is overused; not evenly distributed; and impacted by pollution, contamination and climate change. That's why we equip all our kitchen faucets with a water-saving aerator that reduces water use up to 40% — while maintaining the same pressure. We didn't invent aerators, but think they are an important example of how we can work together to save water for everyone's benefit.

KNOXHULT KITCHEN

When basic functions and low price matters

To make it easy for you, we've already combined ready cabinets with doors, countertops, shelves and drawers. All you have to do is to pick the finishing touches, like knobs, handles and appliances. If you

bring it home from your local IKEA store in the morning, you can have it installed and ready for cooking a late dinner in the evening. On the next pages you'll see what choices you have.

KNOXHULT is functional and easy to plan. Pick the combinations you like, then choose appliances, sink, faucet, knobs and handles. Done!

Base cabinets

KNOXHULT Base cabinet with doors and drawer

You can install a sink and also adjust the space in the cabinet to your needs with two adjustable shelves. The frame and fronts are coated with foil which gives a scratch-resistant surface that is easy to keep clean. You can easily mount the door front in the right position, because the hinges are adjustable in height, depth and width. Stands steady on uneven floors because it has small adjustable feet. The countertop is 3/8" wider than the cabinet. W72xD24xL36".
